THE LATEST AXON EVIDENCE RELEASE
New for the July release - Role-based device settings for AB3 & AB4, custom metadata Auto-Tagging, improved transcription models, and updated ALPR search capabilities.

The July release is scheduled for July 24, 2024.

See the Full Release Notes PDF for details, including a list of resolved issues. The Axon Evidence Maintenance Schedule lists the updated schedule times for your region. We don't anticipate any downtime.

The July Axon release is coming soon. Below is a high-level look at the changes, along with a link to the complete release notes with more details.

Take me to the release notes

What's New in Axon Evidence This Month:

- **Core platform changes**: Final reminder about the shutoff of the legacy sign-in system, which occurs a few days before the monthly release.
- **Auto-Tagging**: Custom Metadata Tagging allows organizations to apply and manage custom metadata fields for video-evidence files.
- **Auto-Transcribe**: Improved Auto-Transcription models with enhanced accuracy for en-us and fr-ca.
- **Axon App**: Accessibility improvements - Resolved multiple issues with ARIA attributes, keyboard navigation, screen reader compatibility, and other elements for enhanced usability.
- **Axon Evidence viewing and playback**: The audit trail now includes detailed marker extraction information.

Axon Evidence Upload XT: XTMT Preview 2: Automated migration tool for on-premise to Axon Evidence, improving reliability and scalability.

- **Axon Investigate**: Patch release 4.1.1 to address performance and functionality.
- **Draft One**: Settings now require only the Edit Agency Settings permission, eliminating the need for the Draft One permission.
- **Justice**: Improvements include displaying the user assigned from the originating organization, fixing errors in adding users to groups, and ensuring consistent display of API client values
- **Third-Party Video Support**: Supports playback of third-party CCTV exports from systems like Milestone, Panasonic, Ocularis, and Synectics.
- **ViewXL**: Resolved issues related to upload permissions, session timeouts, and improved logging for better debugging.

Other Axon Product Updates:
See the full release notes PDF for details on the following items.

- **Axon Body 3**: Firmware update v1.32 includes general bug fixes and improvements, along with role-based device settings that enable the creation of unique device settings profiles based on user roles.
- **Axon Body 4**: Firmware update v1.24206 includes general bug fixes and improvements, along with role-based device settings that enable the creation of unique device settings profiles based on user roles.
- **Axon Dock**: New universal login process.
- **Axon Fleet**: Fleet Dashboard for Android v1.2423 - Includes bug fixes, security enhancements, and stability improvements.
- **ALPR**: Enhanced ALPR record search capabilities.
- **Axon Academy**: New e-learning videos for Axon App, Fleet 3, and Axon Body 4, and availability of international courses.

UI and Accessibility changes
This update includes updates to the user interface for the following features of Axon Evidence. For more information about these changes, please see the appropriate feature sections of the release notes.

- Axon App
- Axon Body 3 and Axon Body 4
- ALPR
- Axon Dock
- Axon Evidence Viewing and Playback
- Justice
- Core platform changes - End-of-life for legacy sign-in
- Auto-Tagging

Coming Soon:

- **Axon Automatic People Detection**: Automatically detects people in videos captured by Axon Body 3 and Axon Body 4 cameras, will be available for pro-licensed users.
- **Third-Party Video Support**: New and updated Third-Party Video Support formats.
